## PATENT REQUEST

Dear IPONZ

I am writing to secure patent on my intellectual property.

This invention design came to me from Heaven as i followed the Way of the (Gospel of )  
Matthew chapters 5 -6 -7 (Jesus sermon on the mount) daily to the best of my ability.

I am the sole receiver of this vision and did not receive this idea form any man.  
Rather i attribute its invention to GOD the Father - who gave me the desires of my heart  
because i followed Him.

As a boy it was my ambition to invent an aircraft that is faster than Concorde - and to be  
an astronaut. As a man i realise that faith must be accompanied by works.

The FISCHER Harmonic Propulsion Engine uses Harmonisation of light and (or) sound  
waves and pulls them together through a lens into a reflective chamber (step one) - This  
creates a Harmonic IMPLOSION which is used to contain (control) Thorium Nuclear  
(fusion) reaction (step two) - Water is then injected into the reaction core { Breaking down  
its atomic structure (H<sub>2</sub>O) } the pressure is then released through a release valve) to  
release the immense force (step 3)

The engine can be adapted for either Air or Space travel.

This formula came to me some time before 2010.

$$\begin{aligned}x + y \\x \cdot y \\x^y\end{aligned}$$

This formula is what i used to develop the concept and diagram.

All aspects of this engine must be perfectly timed measured and housed in appropriate  
(Materials)

Research and development is required to create this reaction and test its potential.

Please protect my intellectual property.

I allow free unlimited and irrevocable use to the New Zealand GOVERNMENT should they wish - retaining my right to patent ownership.

There are records from Psychiatric notes both here (New Zealand) and in Britain - (CONFIDENTIAL Notes)

From :- Te Whare Matairangi - Wellington Hospital, NZ  
And Caludon Centre - Coventry, UK - under Doctor James

Proving i am the sole inventor of this design receiving them (from God the FATHER)

The only other person that i have shared this with in detail is my  
business partner - Jack Jia (Fischer) mobile 021 890 888

Please if you request further more detailed diagrams i am happy to provide them.

I am entrusting this patent request to Jak Wild 021 888 996 - who has been a trustworthy  
advocate in protecting my rights.
